

VICAL® limestone products

Specialty Minerals VICAL® product grade limestones are of high purity, dedusted limestone, characterized by moderate brightness and controlled particle size. VICAL® screened limestone products have a granular appearance with top sizes ranging from 16 to 100 mesh (U.S.). VICAL® limestone products are used in a variety of applications such as: glass manufacture, tile and sheet flooring, asphalt shingles, stucco, plaster and other building products.

Consistent quality of VICAL® screened limestone is assured by process control on all aspects of manufacture, from mining of calcite ore to milling and final packaging. All VICAL® screened limestone products are manufactured from a high quality deposit of natural calcite located in Lucerne Valley, CA. Chemical and mineralogical composition is the same for all VICAL® limestone grades.
