

## DF 1000/2000 (Canaan, CT) dolomitic limestone

DF dolomitic limestone products are produced at our Canaan, CT plant, from a large deposit of high quality, high brightness, marbleized dolomite (calcium-magnesium carbonate). These products are produced in a series of different grain sizes. The product code numbers permit easy identification of product characteristics. The first two digits in the code number indicate the approximate top mesh size. The last two digits indicate the approximate percent passing a 200 mesh sieve.

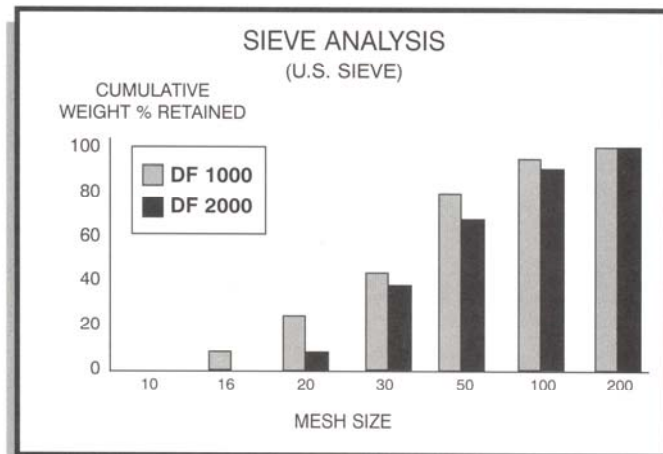

Specialty Minerals Inc. dolomitic limestone products are used in a wide variety of industrial and agricultural applications, such as fillers in stucco aggregates and grout, floor tile, soil treatment, acid neutralization and in swimming pool plaster.

### Typical Properties

	DF 1000	DF 2000
Specific Gravity	2.8	2.8
Bulk Density (pounds/ft <sup>3</sup> )	110	105
(grams/cc)	1.76	1.68

### Chemical Composition (typical)

Calcium Carbonate	CaCO <sub>3</sub>	55.0%
Magnesium Carbonate	MgCO <sub>3</sub>	43.0%
Iron as	Fe <sub>2</sub> O <sub>3</sub>	0.3%
Moisture	H <sub>2</sub> O	0.1%
